

## GAP CAFE

SAN BRUNO, CA

CLIENT / OWNER

Gap Inc.

ARCHITECT

William McDonough; Gensler Associates

DURATION

9 months

SIZE(SF)

195,000

Fisher built the corporate café at Gap Inc.'s new campus near San Francisco. The scope included a new dining room and kitchen with energy efficient equipment. This project was part of the overall 195,000-sf build out across three structures, which housed offices, conference rooms, and a fitness center. Additionally, Fisher built a pair of two-story landscaped atriums, a grand lobby, executive auditorium and conference center. Today, this project is still recognized for its visionary, sustainable design, which preceded the existence of LEED and other industry standards

MARKET SECTOR

Restaurant
